Work Experience

Agric360
March 2023 - Present

- Collaborated with a team of developers to design and implement a scalable web application using Django Rest Framework on the backend, resulting in a high-performance API that handled a large volume of requests from the frontend.

- Coordinated with the project manager to define project scope and allocate resources effectively.

- Participated in daily Scrum meetings to ensure daily progress and project clarity.

Freelancer Developer
August 2022 - January 2023

- Developed and maintained the website's backend functionality to produce clean code that follows the design and functional specifications.

- Installed and setup up existing websites. Fixed the website's bugs and enhanced the website.

- Created a Rest API using Django Rest to communicate better with the frontend.

- Implement scripting with Ajax and jQuery and Javascript to dynamically refresh the page components.

- Responsible for understanding client's needs and finding solutions.

Growth
February 2022 - May 2022

- working with a team of programmers to develop a custom full-stack cms project.

- Oversaw the full lifecycle of software development for 8 projects with 100% on-time delivery while staying 6% under budget.
